adhesive for all  
tile types

QuickSet 6

## Quick Step Guide

ADD WATER

### STEP 1:

Add 5 L of water **Bond-it** additive is recommended for external tiling and wet areas. Full replacement of water in mix.

ADD DRY MIX

### STEP 2:

Add 20 kg of adhesive slowly while stirring mixture.

MIXING TIME

### STEP 3:

Mix to a smooth creamy consistency. Use of a mechanical mixer is preferred for best results.

RAPID SET

### STEP 4:

Allow to thicken for 3 - 5 minutes.

MIXING TIME

### STEP 5:

Final mix - to remove any excess air trapped in mix.

TROWEL APPLICATION

### STEP 6:

Apply adhesive with wall or floor notched trowel in one direction. Avoid the swirling application of tile adhesive.

## TILE INSTALLATION

- weber tylon adhesive solutions can be applied 3 - 20 mm thick
- Depending on the evenness/method of application, consumption can range up to 6 m<sup>2</sup> per 20 kg using a 6 mm notched trowel for wall tiling up to 4 m<sup>2</sup> per 20 kg using a 10 mm notch trowel for floor tiling
