# Quick Step Guide

marbelite

white

Pool Paint

## STEP 1:

- Acid wash, use hydrochloric acid with water with a ratio of 1:3

## STEP 2:

- Scrub and sand. Use a wire brush to scrub and 80 grit sandpaper

## STEP 3:

- Flush with water. Use 3 L of water per square meter

## STEP 4:

- Brush and vacuum

## STEP 5:

- Mixing to be done with an electric mixer. Add liquid first then powder

## STEP 6:

- **Application Part 1.** First coat is to be applied by a soft bristle brush

## STEP 7:

- **Application Part 2.** Second coat is to be applied by a sheepskin roller

## STEP 8:

- Both coats to be applied on the same day

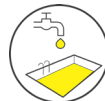

## STEP 9:

- Cleaning. Remove tape and clean surfaces.

## STEP 10:

- Curing, leave the pool to air cure for 6 days. No water to collect in the pool at all

## STEP 11:

- Filling, follow the treatment of newly painted pools guide to fill and maintain the pool

## Application Tip:

To ensure colour consistency • **DO NOT MIX BATCH NUMBERS**
