**Plaskey + Key-it**  
**Plaskey + Key-it (Slurry mix)**

**When to use it:**

- Poor substrate.
- Where waterproofing is required.
- Priming external areas & wet areas.

**On what and where to use it?**

- Timber and steel floated surfaces.
- Timber floors.
- Powder & liquid slurry mix.

**Why do we use it?**

- To improve water resistance.
- Waterproofing.
- Even/flat imperfections.

**When not required?** Where Ultra-flex or Renovate is used.

**Mixing ratio:** 2 parts Plaskey to 1 part Key-It before tiling commences.

**Key-it (Liquid only)**

**When to use it?**

- Where improved adhesion is required.
- Stabilize friable & chalking surfaces.

**On what and where to use it?** Flat surfaces.

**Why do we use it?** To improve adhesion of adhesive.

**When not required?** Where Ultra-flex or Renovate is used.

**Bond-it & Tile Grout**  
**Bond-it (Liquid only)**

**When to use it?**

- For all wet areas and external areas.

**On what and where to use it?**

- Replace water in adhesive & grout.

**Why do we use it?**

- To improve water resistance.
- To improve flexibility.

**When not required?** Where Ultra-flex or Renovate is used.

**Weber All Purpose Tile grout**  
Available in: 2 kg, 5 kg and 20 kg bags

**Colours:**

- White
- Ivory
- Dove Grey
- Oatmeal
- Light Grey
- Namib
- Stone
- Dark Brown
- Charcoal

**Weberepox easy**  
**Weberepox easy (epoxy tile adhesive & tile grout)**

**When to use it?**

- Two-part, resin epoxy tile adhesive and epoxy tile grout.

**On what and where to use it?**

- Excellent resistance to chemical stains.
- Ideal for interior and exterior areas where hygiene conditions are required.

**Packaging:** Supplied in 5 kg kits consisting Part A and Part B.

**Easy to mix**

**Easy to apply**

**Easy to clean**

**Colours:**

- Black
- Cement Grey
- Cream
- Pearl Grey
- White
- Blue

**Super-flex**  
**Super-flex (Ready-mix)**

**When to use it?**
